Are proposed multibillion dollar high-speed railway projects in the United States a smart move or a huge waste of taxpayer dollars? CNN.com users are challenging politicians, policymakers and each other about whether the Obama administration's push to build high-speed rail lines in the Midwest, West Coast and elsewhere is on the right track. Many users want proof that high-speed rail can be a profitable, efficient job generator to help raise the sagging U.S. economy when compared with other types of transportation.

Top U.S. high-speed rail experts, lawmakers respond to CNN.com user comments. [Click here](#) for article.
